

Using Continuing Professional Development (CPD)

You are attending the 2020 ASHP Midyear Clinical Meeting & Exhibition for many reasons, including the ability to earn the continuing education credits you need for your license. Continuing Professional Development is a framework to help you design and implement an education plan that goes beyond meeting your licensing requirements, and facilitates your professional development and competency as a healthcare provider.

- **Reflect:** Identify your learning needs and opportunities; frame your learning objectives.
- **Plan:** Circle in your program or write in the space below those sessions that may meet your learning objectives.
- **Act:** Attend as many of these educational sessions as you can. If you can't get to them all, you need not worry. You will have access to the content after the meeting.
- **Evaluate/Apply:** This is for after the meeting, when you're in your practice setting. Was there an impact? What else do you need to do?
- **Record & Review:** That's the purpose of this page. Tracking your progress is ongoing and essential.
